Fullers Earth:

Fuller's earth is a naturally occurring clay-like material with strong absorbent properties. It is mainly composed of minerals such as **attapulgite**, **montmorillonite**, and other aluminum silicates.

Common Uses

- **Skin care:** Often sold as Multani Mitti. It helps absorb excess oil and is used in face packs.
- **Hair care:** Used in hair masks to remove excess oil and impurities.
- **Industrial applications:** Cleaning oils and grease, filtering substances, and absorbing chemical spills.
- **Cat litter and absorbents:** Due to its high absorbency.

Benefits for Skin

- Removes excess oil (sebum)
- Helps cleanse pores
- Can improve the appearance of oily or acne-prone skin
- Provides a cooling effect when used in face masks

Precautions

- May cause dryness, especially for people with dry or sensitive skin.
- Should not be used too frequently on the face.
- Avoid inhaling the powder.

If you'd like, I can also explain its **chemical composition, medicinal uses, or how to make a Fuller's earth face pack at home**.

How many times per a week is better to apply to the skin

How often to use **Fuller's earth (Multani Mitti)** depends on your skin type:

- **Oily skin:** 2–3 times per week
- **Combination skin:** 1–2 times per week
- **Normal skin:** 1–2 times per week
- **Dry or sensitive skin:** Once a week or less, and mix it with ingredients like yogurt, honey, or aloe vera to reduce dryness

Simple Face Pack

- 1 tablespoon Fuller's earth
- Water or rose water (for oily skin)
- Yogurt or honey (for dry skin)

Apply for **10–15 minutes**, then rinse with lukewarm water and use a moisturizer afterward.

Using it too often can make your skin dry or irritated, so avoid daily use unless advised by a dermatologist.

• Chemical spills: Uncontrolled release of hazardous solids, liquids, or gases that pose immediate risks to human health, property and the environment

• Cat litter: an absorbent material placed in a indoor litter box to allow domestic cats to eliminate waste hygienically
